

# Industrial solutions for Canada – local service, global expertise

Turnkey equipment, automation and retrofit services for steel, paper and manufacturing.

## Snapshot

- Canadian branch of Structural Testing Equipment (UAE), bringing decades of global experience to local manufacturers.
- Rapid response service, spare parts supply, and technical training to keep production lines running.
- Retrofitting and plant optimization that boost throughput while reducing capital investment.

## Our Story

IQSAH Infrastructure Holdings Ltd. was established in Ontario in March 2022 as the Canadian subsidiary of Structural Testing Equipment Devices Trading LLC in Dubai, U.A.E.

Created to serve Canada's growing industrial market, IQSAH combines global expertise with a local management team dedicated to delivering high-quality machinery and comprehensive services.

## What We Deliver

- **Equipment supply & selection:** Cutting, coating, forming, processing and measuring systems tailored to production needs.
- **Turnkey installations:** Project-managed delivery from design through commissioning and operator training.
- **Automation & integration:** PLCs, control systems and production-line integration for higher consistency and efficiency.
- **Service & maintenance:** Preventive maintenance, spare parts, and on-site troubleshooting to minimize downtime.
- **Retrofitting & plant optimization:** Modular upgrades that extend asset life and increase output without major capital outlay.
- **Technical training & support:** Operator and maintenance training to ensure safe, efficient operation.
- Continue investing in rapid response services and spare parts availability to reduce client downtime.

Let us explore how IQSAH can enhance the performance of your plants. Please contact our Canadian team to arrange a site visit assessment.

## How We Engage (4 Steps)

### Discovery & site assessment:

Evaluate operations and identify highest-impact improvements.

### Custom solution design:

Equipment selection or retrofit plans aligned to performance KPIs and budget.

### Delivery & commissioning:

Managed installation, testing and operator training for a seamless handover.

### Ongoing support:

Service agreements, spare parts logistics and performance monitoring to ensure uptime.

# Canadian Achievements

IQSAH Infrastructure Holding Ltd. has already made significant progress within the Canadian market. In 2024, the company secured a long-term contract with a leading advanced engineering firm based in Scarborough, marking a strong entry into the local industry. This achievement highlights IQSAH's ability to provide high-quality industrial solutions tailored to Canadian clients. The company's ability to establish such partnerships within a short span of time highlights its strategic approach to market entry and its capability to provide customized solutions. Through strong industry relationships, IQSAH aims to solidify its presence, creating a network of reliable clients and expanding its reach across Canada's manufacturing and industrial sectors.

Initially, IQSAH's growth projections were based on a rapidly expanding manufacturing sector. However, the impact of COVID-19 and subsequent economic challenges has made it clear that businesses require cost-effective and flexible solutions to maintain operations, which required a reassessment of business strategies. As a result, the projections were different from what was expected. Despite it all, IQSAH has successfully adapted by focusing on retrofitting and plant optimization, ensuring that clients can maintain production without overextending financially.

Despite market fluctuations, IQSAH still continues to grow annually, demonstrating strong financial stability and increasing contributions to the economy. Responding to the increase in service demand. With projected revenue growth and continued investment in technology and personnel, IQSAH is set to enhance its role in industrial modernization efforts across Canada. By ensuring that manufacturing businesses have access to efficient and affordable solutions, IQSAH strengthens Canada's position as a competitive manufacturing hub, driving long-term economic sustainability.

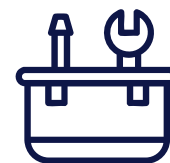

The presence of IQSAH in the Canadian market is not just beneficial to its direct clients—it is a vital part of the broader economic framework supporting industry stability, innovation, and job retention. As the company continues to expand, it will remain a key player in Canada's ongoing efforts to modernize its industrial sector and maintain a globally competitive manufacturing landscape.
